<i>About the Author</i>	<i>xviii</i>
<i>About the Technical Reviewer</i>	<i>xix</i>
<i>Acknowledgments</i>	<i>xx</i>
<i>Preface</i>	<i>xxi</i>

Part One

Background	1
-------------------------	----------

Chapter 1 The Physiology of Linux	3
--	----------

<i>The Origins of Linux</i>	<i>3</i>
<i>The Nature of an Operating System</i>	<i>5</i>
Resources	<i>6</i>
The Kernel	<i>7</i>
System Libraries	<i>7</i>
Is Linux an Operating System?	<i>8</i>
<i>Linux and GNU</i>	<i>8</i>
<i>GNU and Linux: The Operating System of Champions</i>	<i>10</i>
The ls Program	<i>10</i>
gzip, bzip2, tar, and vim	<i>11</i>
The Secret of Success	<i>11</i>
<i>The Zen of the Platform</i>	<i>12</i>
<i>The GNU/Linux vs. Linux Debate</i>	<i>13</i>
<i>References</i>	<i>14</i>

Chapter 2 An Open Source Primer	15
--	-----------

<i>The Nature of Software</i>	<i>15</i>
<i>Open Source vs. Free Software</i>	<i>17</i>
<i>Open Source Software in Action</i>	<i>18</i>
Horizontal Applications	<i>19</i>
Collaborative Software Development	<i>20</i>
<i>Licensing Open Source</i>	<i>21</i>
The GNU General Public License	<i>22</i>
The BSD License	<i>23</i>

The GNU Lesser General Public License	24
The Mozilla Public License	25
Other Licenses	25
<i>A License to Code</i>	25

Part Two

Linux Distributions.....27

Chapter 3 The Nature of a Distribution.....29

<i>Taking a Snapshot of the Linux Continuum</i>	29
<i>Understanding the Goals of a Distribution</i>	31
<i>Dissecting a Linux Distribution</i>	32
Linux Kernel	33
Packaging Format	35
Filesystem Layout	37
System Startup Scripts	41
System Library Versions	43
X Window Desktop	44
Application Software	50
<i>Enter the Linux Standards Base</i>	51
<i>Summary</i>	51

Chapter 4 Red Hat Linux 7.3.....53

<i>Red Hat's Background and Philosophy</i>	53
<i>Linux Kernel</i>	54
<i>Packaging Format</i>	55
Technical Summary	56
Using RPM	58
Querying Uninstalled Packages	60
Installing Packages	61
Upgrading Packages	62
Querying Installed Packages	63
Verifying Installed Packages	64
Rebuilding Packages	65
Uninstalling Packages	66
Creating New Packages	66
Additional Functionality	67
Mechanism vs. User Interface	67
Examples of Using RPM	68

<i>Filesystem Layout</i>	69
<i>System Startup Scripts</i>	71
Understanding Init Runlevels	72
File and Directory Layout	73
Tracing an Execution	77
The Runlevel Configuration Script	80
Manually Configuring the System	81
Using Red Hat's Tools	83
<i>Core System Libraries</i>	85
<i>The X Window System and the Desktop</i>	86
XFree86	87
GNOME and KDE	88
<i>Userspace Applications</i>	89
Understanding the Core Distribution	90
Source Code and Documentation CDs	90
Red Hat Linux Editions	91
Finding Additional Software	91
<i>Red Hat Linux Idiosyncrasies</i>	92
Using the GRUB Boot Loader	92
Managing Similar Software	92
Upgrading to a Stock Kernel	93
User Environment	96
Red Hat Linux and Inetd	97
Mastering Red Hat's Configuration Directories	98
Working with Kudzu	99
Installing TrueType Fonts	100
Ensuring System Security	101
<i>Derivatives of Red Hat Linux</i>	103
Mandrake	103
Caldera	103
TurboLinux	104
<i>Summary</i>	104
 <i>Chapter 5 Slackware Linux 8.0</i>	105
<i>Slackware's Background and Philosophy</i>	105
<i>Linux Kernel</i>	106
<i>Packaging Format</i>	107
Technical Summary	107
Managing Installed Packages	108
Installing Packages	109
Upgrading Packages	109
Uninstalling Packages	110

Creating New Packages	110
Mechanism and User Interface	110
<i>Filesystem Layout</i>	111
<i>System Startup Scripts</i>	112
File and Directory Layout	112
Tracing an Execution	119
<i>Core System Libraries</i>	120
<i>X Window System and Desktop</i>	121
XFree86	121
GNOME and KDE	122
<i>Userspace Applications</i>	122
Included Applications	123
ZipSlack	123
<i>Slackware Linux Idiosyncrasies</i>	124
Configuring Inetd	124
Ensuring System Security	128
<i>Customizing the User Environment</i>	133
Changing a User's X Window Desktop Environment	134
Adding New Hardware	135
<i>Derivatives of Slackware Linux</i>	136
SuSE Linux	136
Peanut Linux	136
<i>Summary</i>	137
 Chapter 6 Debian GNU/Linux 3.0	139
<i>Debian's Background and Philosophy</i>	140
The Debian Social Contract	140
The Debian Policies	141
<i>Linux Kernel</i>	141
<i>Debian Packaging</i>	142
Technical Summary	142
Managing Packages with Debian's System	147
Upgrading the System	153
Manipulating Debian Package Archives	154
Managing Source Code	155
Installing Non-Debian Packages	155
Mechanism and User Interface	156
<i>System Startup Scripts</i>	157
Locating the SysV Directories	157
Working with Debian's Tools	158
Differences in /etc/inittab	159
<i>Core System Libraries</i>	160

<i>The X Window System and the Desktop</i>	161
<i>Userspace Applications</i>	161
<i>Debian GNU/Linux Idiosyncrasies</i>	162
Touring the /etc Directory	162
Configuring the X Display Manager	165
Securing the System	166
<i>Derivatives of Debian GNU/Linux</i>	168
<i>Summary</i>	169

Part Three

Installing Software.....171

Chapter 7 Installing and Configuring Software.....173

<i>Getting Started</i>	173
Reading the Documentation	174
Accepting the License	174
<i>Software Installation in Six Easy Steps</i>	174
Choosing Between a Source and a Binary Installation	175
Deciding on a Destination	177
Building the Software	180
Configuring the Software's Settings	181
Configuring the User Environment	185
Hooking into the Operating System	185
<i>Software Installation Tools</i>	186
Using GNU autoconf	186
Using Red Hat's Tools	188
Using Slackware's Tools	190
Using Debian's Tools	192
<i>Summary</i>	193

Chapter 8 OpenSSH Secure Shell.....195

<i>Installing OpenSSH</i>	196
Compile-Time Options	196
Installing from Source Code	198
<i>Configuring OpenSSH</i>	198
Configuring the ssh Client	199
Configuring the sshd Server	203
Enabling X Window Connection Forwarding	203
OpenSSH Configuration Summary	204

<i>Installing OpenSSH on Different Distributions</i>	204
Installing OpenSSH on Red Hat Linux	204
Installing OpenSSH on Slackware Linux	206
Installing OpenSSH on Debian GNU/Linux	207
<i>Summary</i>	207
 Chapter 9 Pluggable Authentication Modules	209
<i>Installing PAM</i>	210
<i>Configuring PAM</i>	211
Constructing the Configuration File	211
Installing PAM on Different Distributions	219
<i>Summary</i>	220
 Chapter 10 Dante SOCKS Library	221
<i>Installing Dante</i>	223
Setting the Installation Path	223
Compilation and Installation	224
Installation Summary	225
<i>Configuring Dante</i>	225
Locating the Configuration File	225
Obtaining Network Settings	226
Format of the Configuration File	227
A Sample File	229
<i>Installing Dante on Different Distributions</i>	231
Installing Dante on Red Hat Linux	231
Installing Dante on Slackware Linux	231
Installing Dante on Debian GNU/Linux	231
<i>Summary</i>	232
 Chapter 11 The Apache HTTP Server	233
<i>Installing Apache</i>	234
Compile-Time Options	235
Completing the Installation	240
<i>Configuring Apache</i>	241
Navigating the Installation Directory	241
Customizing Apache	248

<i>Installing Apache on Different Distributions</i>	250
Installing Apache on Red Hat Linux	250
Installing Apache on Slackware Linux	253
Installing Apache on Debian GNU/Linux	253
<i>Summary</i>	254
 Chapter 12 Concurrent Versions System	255
<i>Installing CVS</i>	257
Compile-Time Options	257
Installing from Source Code	259
<i>Configuring CVS</i>	260
Creating the Repository Directory	260
Creating the User Accounts	261
Setting Permissions	263
Establishing the Run-Time Parameters	267
<i>Installing CVS on Different Distributions</i>	267
Installing on Red Hat Linux	268
Installing on Slackware Linux	272
Installing on Debian GNU/Linux	273
<i>Summary</i>	274
 Chapter 13 Sun Microsystems’ Java Development Kit	275
<i>Installing the J2SDK</i>	276
<i>Configuring the J2SDK</i>	278
The /opt/java Directory	279
Installing Multiple JDKs	279
Installing JAR Files	280
Configuring the User Environment	281
<i>Pulling It All Together</i>	284
<i>Installing the J2SDK on Different Distributions</i>	285
Installing on Red Hat Linux	285
Installing on Slackware Linux	286
Installing on Debian GNU/Linux	286
<i>Summary</i>	287

Part Four	
Case Studies	289
 <i>Chapter 14 Building a Desktop System</i>	 291
<i>Getting Started</i>	291
Who This Example Is For	291
Defining a Desktop	292
Contents of This Chapter	293
<i>Building the System</i>	294
Selecting the Packages	294
Details of the Configuration	294
<i>Using Desktop and Productivity Applications</i>	295
Desktop Environment	295
Office Productivity	297
Personal Finance	299
<i>Web Browsing</i>	300
The Selection: Konqueror and Mozilla	301
The Alternatives: Galeon and Opera	302
Browser Plug-Ins	302
<i>Support for Hardware</i>	305
Using a ZIP Drive	305
Using USB Devices	308
Using a CD Writer	313
Using 3D Graphics Cards	314
<i>Exploring Media and Entertainment Options</i>	316
Working with Digital Cameras	316
Manipulating Photographs with the GIMP	317
Creating Compact Discs	317
Playing Digital Audio Files	319
Watching Digital Video Files	321
Playing Games	323
<i>Implementing Connectivity and Remote Access</i>	324
Accessing the Desktop Remotely	324
Providing Other Services	325
<i>Summary</i>	326

Chapter 15 A Corporate Software Development Environment	327
<i>Getting Started</i>	327
Who This Example Is For	327
What the System Is Used For	328
<i>Building the System</i>	328
Starting with the Desktop	328
Selecting Packages	329
Details of the Configuration	330
<i>Network and Management Tools</i>	330
Understanding the Local Network	330
Using DHCP on the System	331
Installing the portmap Service	332
Using Network Information Services	332
Using Network Filesystem Services	335
Managing Assets	338
Providing Remote Root Access	338
<i>Development Environment</i>	339
Installing the Core Development Tools	339
Configuring the Java Environment	340
Using the Apache HTTP Server	347
Running J2EE Applications with Tomcat	347
<i>Corporate Interoperation</i>	348
Using OpenOffice for Business Documents	348
Running VMware	349
<i>Security Issues</i>	350
Understanding the Local Network's Security	350
Securing the Workstation	351
<i>Alternate Configurations</i>	352
Using an Alternate Application Server	352
Using Other Web Languages	353
Developing Traditional Software	354
<i>Summary</i>	354

<i>Chapter 16 Building a Network Firewall</i>	355
<i>Getting Started</i>	355
What Is a Firewall?	356
Practicing Safe Computing	356
Who This Case Study Is For	357
Replacing the Default Firewall	358
<i>The Elements of a Linux Firewall</i>	359
Minimizing Exposure	359
Locking Out the Bad Guys	360
Masquerading	361
Servicing the Network	364
<i>Building the Firewall</i>	364
Required Hardware: Ethernet cards	364
Choosing Installation Media	368
Slimming Down the Package List	369
Adding Security Packages	371
Setting Up User Accounts	372
Configuring a New Kernel	372
Creating the Startup Scripts	373
Validating the Installation	388
Summary and Limitations	389
Supporting Internal Machines	389
<i>What You've Accomplished So Far</i>	397
<i>Monitoring and Maintaining the System</i>	398
Configuring the System Logger	398
Monitoring Firewall Traffic	401
Classifying Packets	403
Care and Feeding of Your Firewall	403
Security in Depth	405
<i>Investigating Advanced Security Techniques</i>	406
Using the Tripwire Intrusion Detection System	406
Integrating a Wireless LAN	408
Enhancing the DNS Server	409
Bootting from Read-Only Media	409
Setting Up a VPN with SSH	410
<i>Summary</i>	411
<i>A Farewell</i>	412
<i>Bibliography</i>	412

Appendix	414
<i>Running with the Ball: Additional Configurations</i>	414
<i>Continuing Education</i>	414
Linux-Kernel List	414
Distribution Mailing Lists	415
<i>Tracking Ongoing Work and Initiatives</i>	415
Pursuing Security	416
Improving the Kernel	416
Stretching and Squeezing the System	417
<i>Summary</i>	417
 Index	 419
